## VIBRATORY PLATE

HONDA  
eGX

### APPLICATIONS

- Compaction in confined areas
- Asphalt and paving applications
- Light to medium patchwork
- Pipeline and trench construction
- Landscaping and gardening
- Earthwork

### PRODUCTIVITY

#### Electric performance, same compaction

Delivers powerful compaction performance equivalent to petrol models, ensuring no compromise in results while offering the benefits of electric operation.

#### Balanced base plate design

Ensures even compaction with no weak spots -maximizes speed and quality output.

#### Tool-free versatility

Quick swaps between asphalt and paving stone work with optional pads and sprinklers.

#### Interchangeable battery system

The Honda battery pack is compatible with other Ammann e-machines (e.g., eRammer), allowing seamless swapping between tools. A shared charger and transport box simplify logistics and reduce downtime.

#### Fast charging

The battery pack charges quickly. The machines can be charged overnight to maximise capacity the next day. They also can be charged for a shorter period during the shift and quickly return to work.

### ERGONOMICS

#### Low-vibration handle

Low HAV values protect operators and reduce the need for compliance tracking.

#### Intuitive start/stop

Simple push-button operation reduces fatigue and training time.

#### Compact control and handling

Easy-grip frame and centralized lifting hook allow smooth movement and fast positioning.

### SERVICEABILITY

#### Minimal maintenance

No daily maintenance or oil changes - electric motor eliminates most consumables.

#### Durable base plate

No welding or bending = no structural weaknesses, no plate maintenance needed.

#### Smart design

Toolless access for all daily checks and optional hour counter for maintenance tracking.

### SUSTAINABILITY

#### Zero emissions

Electric drive produces no exhaust, ideal for urban, enclosed, or green-sensitive sites.

#### eMission-compliant

Part of Ammann's sustainability initiative for reduced CO<sub>2</sub>, optimized digital efficiency, and electrification.

#### Low-noise operation

Perfect for residential, indoor, or night work.

#### Long-life battery

Li-Ion-Battery maximizes safety, life span, and recyclability.
